Podium / Aircraft Type Access Working Platforms

Step ladders should not be used unless it can be demonstrated through risk assessment that they are safe to use and that all other forms of access equipment are not practical.

Podium type working platforms have been developed by working together with a chosen manufacturer to provide a safer method of working at height.

Aircraft Type Access Equipment

Pulpit Type Access Equipment

- Mobile with locking castors
- Multiple working heights
- Folds for easy movement and fits into van or estate car
- Quick and easy assembly and dismantling
- Lightweight aluminium rigid construction
- Passes through standard door opening
