

New Product - Joint Thermal Insulator

How many times have you designed an external beam connection to an internal column or floor beam? 100's probably! Now how many times have you considered thermal insulation of the joint?, Not many if ever at all. Well "Schok" have a relatively new product which is an insulated packer which fits between the joint and reduces heat loss caused by cold bridging. It also apparently prevents other nasty items such as damp patches, mould etc.

Laborious, non-cast effective constructions are now obsolete. Broader horizons for planners and architects.

Planungssicherheit
Einfach zu planen durch Typenstark und ausführliche Planungsunterlagen.

Planning security
Easy to design due to its model range and the freely available comprehensive documentation.

Modularer Aufbau
Durch separate Zwischensteile kann die Höhe vor Ort individuell eingestellt werden.

Modular construction
Because of separate spacing parts, the height can be varied on site.

Einfacher Einbau
Montage wie bei üblichen Striplottenanschlüssen. Alle gängigen Stahprofile sind anschließbar.

Simple installation
Easy to fix with regular head plate connections, all available steel profiles can be bolted on.

Hoch belastbar
Hohe Beanspruchbarkeit an Biegemoment und Querkraft.

High performance
Able to take demanding loads, effective against bending moment and shear force.

Gepüft
Jetzt mit Typenprüfung von der LGA Nürnberg

Stamp of approval
Available with type testing certificate.

Warning

This is a new product so ensure you check it out fully!
