

## Easily Configurable Cable Transits and Securing Mechanism

*An effective cable management strategy can help provide useful guidance to all, ensuring a standardised system and the same level of protection afforded across all applications and sites that come under its umbrella. Standardised systems, give great potential cost savings at all stages during design, installation, re-fit and operation.*

### Key Points:

- **One block covers a range of cable sizes with the easily peeling layers (6 blocks cover all sizes from 3.5mm to 99mm OD)**
- **No additional costs to purchase blocks to replace blanks when modifications are made. Life cycle cost**
- **Reduced design time to design cable transits.**
- **Pre-terminated cable compatible**
- **Accommodates changes through the build programme**
- **Free design support – drawings**
- **Installation support – including inspection**
