

# Emergency Call

On a recent project Lend Lease installed 15 wireless emergency boards at various strategic locations across the site.

Should an emergency happen, anyone can press the button and sound the alarm. The location of the emergency is then indicated in the control room, allowing the management team to have the quickest possible response.

## Sequence

- The locations are separated by difference areas, floors;
- Install the indicators and maps at office.
- Install the wireless emergency boards on at site.

## Advantages

- Quick Response to specific locations in an emergency.
- No trailing leads so reduced trip hazards.
- Quick and easy installation.
- Boards can be moved as work progresses.
- Boards can be moved closer to the work area if needed.

## Issues to Consider

- Monitor battery power with regular checks.
- Boards are suitable for the environment they are placed in.
- Educate workers on the importance of the system.
